David T. Contento, FACMPE

Neuro Rehabilitation Center

Kenneth A. Citak, MD
Medical Director

John Jensen, PT
Director of Rehabilitation

INFORMATION REGARDING ATHENA DIAGNOSTICS

Athena Diagnostics is a reference laboratory specializing in blood test for a variety of different neurological disorders. There are several specialized blood tests our physicians may request for you, providing them with information that may assist in determining appropriate treatment for you. These specialized blood tests are only offered at Athena Diagnostics.

The test are costly and may not be covered by your insurance plans. Neurology Group of Bergen County has no control over what services your insurance policy will cover. We advise you to contact your insurance companies to determine benefit coverage for these particular blood tests.

We will provide you with CPT codes and diagnoses for the blood test, should your insurance company request them from you. Athena's reimbursement service department can also assist you with any questions you may have. You may contact them at 800-394-4493.

Please contact our office once you have determined eligibility for the blood tests, so that we may schedule you for an appointment for the drawing of the blood work. Kindly advise us if you choose not to proceed with having these tests done.
